Introduction

This paper describes the FTSE equity country classification process which is designed to be transparent and evidence driven. External advisory committees ensure that the criteria used to determine country classification meet the needs of global investors and are judged objectively. Consistent with the Principles for Financial Benchmarks published by IOSCO in 2013, the operation of the process is overseen by FTSE Russell's strong internal governance structure.

By classifying countries according to objective criteria, and engaging with stock exchanges, regulators and central banks in those countries where the market is being considered for potential promotion or demotion, the process provides portfolio managers and asset allocators with a clear view of expected future index evolution.

History

The FTSE Global Equity Index Series (GEIS) had its genesis in 1987 with the creation of the FT-Actuaries World Index. As the name suggests, the index was a collaborative venture between the Financial Times and the Institute and Faculty of Actuaries; the other founding partners were the investment bank Goldman Sachs and broker Wood Mackenzie and Co. At inception the index covered 23 countries and there was no distinction between developed and emerging markets.

In 1995, Wood Mackenzie sold its stake to Standard and Poor's, giving rise to the FT/S&P Actuaries World Index, and in 1997 when FTSE took over the calculation the index was renamed as the FTSE/S&P- Actuaries World index. FTSE, which had been formed as a joint venture between the London Stock Exchange and the Financial Times in 1995, bought out the other partners in 1999 and the index was renamed as the FTSE World Index.

Country and capitalisation (cap) coverage were expanded further with the incorporation of the Barings Emerging Market Index in 2000. This added 20 countries and extended coverage to 90% of global equity markets. At the time of this expansion, the opportunity was taken to classify the countries in the existing World Index into "Developed" and "Advanced Emerging" markets. The additional countries from the Barings index were classified as "Emerging" markets and their combination with the World Index was termed the FTSE All-World Index covering Large cap and Mid cap sized designated companies. FTSE GEIS was launched in 2003, expanding coverage to include Small cap designated companies. A fourth grouping, "Frontier" markets, was introduced in 2008 to capture those markets not yet sufficiently evolved to be categorised as Emerging. As of March 2022, FTSE GEIS includes 48 countries with a further 30 countries classified as Frontier markets.

Classification Schemes

Early distinctions between developed and emerging markets were somewhat arbitrary and tended to focus on the relative wealth of countries as the distinguishing measure, together with subjective judgements about the quality of the market. This lack of transparency made it hard for investors to gauge the likelihood of countries moving between categories and did not foster the spirit of engagement that would encourage countries to adopt global best practice in pursuit of promotion. The expansion of the GEIS prompted FTSE to launch a client consultation in 2003 which proposed a structured framework for classifying markets that would be consistent with FTSE's philosophy of rules-based, objective indices. As well as consideration of country per capita income, the proposal set out other guiding principles for market classification. These were:

- **Quality of Market** – the quality of regulation, the dealing landscape, custody and settlement procedures, and the presence of a derivatives market would all be considered;
- **Materiality** – a country needed to be of material size to warrant inclusion in a global benchmark;
- **Consistency and Predictability** – a pathway to classification changes would be set out by announcing a “Watch List” of countries that were being considered for promotion and demotion as well as the criteria by which countries would be judged;
- **Cost Limitation** – the cost of implementing a change would be considered when assessing a market for promotion or demotion;
- **Stability** – a phased approach would be taken to the introduction of new countries; a new country would only join as an emerging market; and promotion would only occur in response to permanent changes in market status and global acceptance; and
- **Market Access** – international investors should be able to invest and withdraw funds in a timely and secure manner at reasonable cost.

The results of the consultation were published in November 2003. These showed very strong support for the inclusion of Quality of Markets criteria along the lines summarised above. The majority of respondents were also in favor of the other principles. On the basis of the support received, FTSE moved ahead with implementing the equity country classification scheme in 2004.

The FTSE Equity Country Classification Process

Following the 2003 client consultation, FTSE put in place a formal process for assessing markets. This process had the following elements:

- A Quality of Markets matrix against which markets could be objectively judged and compared.
- A questionnaire with which to engage stock exchanges and regulatory authorities, the responses to which would help form the basis of the initial Quality of Markets assessment and subsequent upgrades.
- A new FTSE Country Classification Advisory Committee reporting to the FTSE Russell Policy Advisory Board that would undertake objective assessments of markets against the Quality of Markets criteria.
NB: as of January 2022, the FTSE Country Classification Advisory Committee was renamed as the ‘FTSE Equity Country Classification Advisory Committee’ and no longer reported into the FTSE Russell Policy Advisory Board.
- A Watch List consisting of those countries that are judged to meet, or to be close to meeting, the Quality of Markets criteria for promotion or demotion that would act as a staging post for subsequent country classification changes.
- A policy of engagement with markets that were placed on the Watch List to help them understand what steps would need to be taken to improve their current assessments to make them eligible for promotion (or to prevent their demotion).
- An annual schedule for determining country classification and Watch List changes culminating in country classification and Watch List changes being announced in September.
- A defined communication and implementation timetable to allow portfolio managers to make the necessary preparations for changes to classifications.

Further details regarding these elements are provided below.

Quality of Markets Matrix

The Quality of Markets matrix is central to the above process. An example of the Quality of Markets matrix for the Emerging Europe region as of September 2021 is provided in Appendix 1. For example, the Czech Republic, Greece, Hungary and Turkey are currently classified as Advanced Emerging markets, and Romania and Russia as Secondary Emerging markets. The matrix also includes information on the Gross National Product per capita (Atlas Method) as calculated by the World Bank; this was one of the original mechanisms used to help distinguish between the different classifications. The country's credit rating is a more recent addition to the criteria.

The rest of the matrix was divided into the original four sections that were introduced from 2004, covering regulation, dealing landscape, custody and settlement, and the presence of a derivatives market with each section further broken down into those factors that are considered essential ingredients for each classification. Markets are scored as "Pass", "Restricted" (partial failure) or "Not Met" on each of these factors. Developed markets should not fail on any category, although a very small number of Restricted scores may be accepted. Advanced Emerging markets have to pass fewer categories, and Secondary Emerging and Frontier markets fewer still. Additionally, for a market to be classified as Developed, Advanced Emerging and Secondary Emerging, real-time security level prices must be available via third party data vendors. End-of-day security level prices will suffice for attaining Frontier market status.

The Quality of Markets matrix is reviewed on a regular basis to reflect developments in equity markets and to ensure the country classification process continues to meet the needs of global investors. As a result, from January 2020 the four original sections were enhanced to cover: Regulation, Foreign Exchange, Equity Market facilities, and Clearing, Settlement and Custody. A new criterion covering 'Tax – imposition of taxes to be reasonable, consistent in nature and comparable between domestic and non-domestic investors' is introduced from September 2021.

Further details regarding the January 2020 and September 2021 enhancements to the FTSE Quality of Markets matrix and the FTSE Country Classification process can be assessed using the following link: [FTSE Equity Country Classification Process Enhancements](#)

Appendix two shows the FTSE Quality of Markets matrix that is effective from September 2021 and the relevant criteria for each classification.

Questionnaire

In the case of countries that have not previously been evaluated, or countries where a re-assessment is considered timely, a questionnaire is sent to country contacts, usually at the stock exchange, inviting responses on the criteria covered by the Quality of Markets matrix. The questionnaire breaks each criterion into its essential details and requests information on these aspects so as to facilitate a reasoned determination of the country's score.

The FTSE Equity Country Classification Advisory Committee

The FTSE Equity Country Classification Advisory Committee is formed of market practitioners with technical expertise in trading, portfolio management, and custody who are able to provide first-hand experience of each of these areas. Each country's scores on the Quality of Markets matrix are kept under review and proposals for changes to scores are debated at the meetings of the FTSE Equity Country Classification Advisory Committee. Any changes to the scores recommended by the Committee are duly minuted and changes to country scores are formally communicated by FTSE Russell to the relevant authorities each year in March and September.

The FTSE Equity Country Classification Advisory Committee also reviews the responses received to the engagement questionnaire. In many cases the Committee will ask for further research to be undertaken or will themselves check with their colleagues as to whether a response is confirmed by their practical experience of market conditions, before finally deciding on a country's scores on the Quality of Markets criteria.

The FTSE Russell Policy Advisory Board

The FTSE Russell Policy Advisory Board is the most senior of FTSE Russell's external advisory committees and draws its membership from senior personnel at investment management companies, investment consultants and asset owners. For the equity country classification process, the FTSE Russell Policy Advisory Board helps to ensure in the final analysis, that proposals for classification changes initiated by reference to the requisite number of criteria being judged to exceed the requirements for country promotion or failing to meet the requirements to prevent country demotion, are consistent with the perceptions of seasoned investors at that time.

The Watch List

To enable investors to plan for potential classification changes, FTSE Russell operates a Watch List of countries with scores on the Quality of Markets matrix that have been judged to have met, or are coming close to meeting, the technical criteria required for reclassification. The Watch List also includes those countries with scores that have been judged to have fallen below those required to maintain the countries' current classifications and are being considered for demotion.

Absent any extraordinary circumstances, a country must stay on the Watch List for at least six months, and may potentially remain there for several years, before it is considered ready for reclassification. Additionally, once the market is reclassified it must remain in that classification segment for a minimum of one year before it can be considered for addition to the Watch List for another reclassification. This is consistent with the principles set out earlier that countries should only change classification infrequently, when the appropriate standards have been confirmed for a period of time, and that investors should be forewarned of the prospect. A seasoning period on the Watch List thus allows investors to become comfortable that the technical criteria assessed through the Quality of Markets framework are indeed being met in practice.

Implementation of classification changes is ordinarily timed to coincide with one of the semi-annual reviews for FTSE GEIS or the annual review of the FTSE Frontier Index. Absent any extraordinary circumstances, a minimum notice period of six months is provided. The length of the notice will primarily be determined by the need to ensure that there is sufficient time for market participants to adequately prepare for the reclassification.

Engagement

To encourage those markets on the Watch List to adapt their procedures to meet international best practice, FTSE Russell actively engages with the appropriate authorities of those countries that have been added to the Watch List with a view to helping them understand the standards required for their future promotion, or to prevent their future demotion.

Minimum Investable Market Capitalisation and Securities Count

In order for a country to be classified as Developed, Advanced Emerging or Secondary Emerging, it must meet the required criteria for those categories as set out in the FTSE Quality of Markets matrix and also meet the minimum investable market cap and securities count thresholds which were introduced from January 2020. The minimum investable market cap and securities count requirements have been introduced to ensure that FTSE GEIS and associated global benchmarks represent sizeable and liquid markets. Countries were evaluated against these thresholds from March 2020.

The minimum investable market cap cut-off levels will be calculated semi-annually, as follows:

- Year-end values will be used for assessing markets as part of the March Interim Update.
- Last trading day in June values will be used for assessing markets as part of the September Annual Review.

The tables below illustrate the thresholds based on data as of the close on 31 December 2020.

Developed Market

- **Entry** = the combined investable market cap of the eligible securities is greater than five basis points of FTSE Developed All Cap Index **and** a minimum of five securities meet the FTSE Global All Cap Index eligibility screens.
- **Exit (placed on Watch List)** = the combined investable market cap of the eligible securities falls below two and a half basis points of FTSE Developed All Cap Index, **or** the number of eligible stocks decreases to two or below.

Developed	Minimum Stock Requirement	FTSE Developed All Cap	Investable Market Cap*	GNI
Entry	5	5 Basis Points	USD 35.54bn	High
Exit	2	2.5 Basis Points	USD 17.77bn	

*Prices as of close 31 December 2021

Emerging Market

- **Entry** = the combined investable market cap of the eligible securities is greater than 10 basis points of FTSE Emerging All Cap Index **and** a minimum of five securities meet the FTSE Global All Cap Index eligibility screens.
- **Exit (placed on Watch List)** = the combined investable market cap of the eligible securities falls below five basis points of FTSE Emerging All Cap Index, **or** the number of eligible stocks decreases to two or below.

Secondary Emerging	Minimum Stock Requirement	FTSE Emerging All Cap	Investable Market Cap*	GNI
Entry	5	10 Basis Points	USD 7.83bn	Lower Middle
Exit	2	5 Basis Points	USD 3.92bn	

*Prices as of close 31 December 2021

Classification as a Frontier market does not require the country to meet the minimum size and securities count eligibility requirements for the creation of a country level index.

Annual Schedule

The FTSE equity country classification process operates to an annual schedule starting in October and finishing the following September. The process starts with in-depth assessments of those markets on the Watch List as agreed in the previous September, and those countries highlighted for possible addition to the Watch List next September.

During the Country Classification year, the Quality of Markets' scores for current and potential Watch List countries are reviewed by the FTSE Equity Country Classification Advisory Committee. Throughout this period, evidence of improvements or deterioration in a country's scores is actively sought through engagement with the appropriate authorities of the country concerned.

The concluding debate on changes to the Watch List takes place at the September meeting of the FTSE Equity Country Classification Advisory Committee. Also at this meeting, the countries on the Watch List are formally reviewed for promotion or demotion. FTSE Russell's recommendations for country promotions and demotions, if any, are presented to the September meeting of the FTSE Russell Policy Advisory Board. Subsequently, FTSE Russell seeks an affirmation from the FTSE Russell Policy Advisory Board of the promotion and demotion recommendations, which are then forwarded to the FTSE Russell Index Governance Board in September for final approval.

An announcement of a market reclassification may be made at the March Interim Update, subject to the approval of the FTSE Russell Index Governance Board, and with the support of the FTSE Equity Country Classification Advisory Committee and the FTSE Russell Policy Advisory Board.

To inform the market of the date of the Interim Update and the Annual Announcement, a public notice is published on the FTSE Russell website and sent to clients in advance of the announcement date.

Communication

Following the September or the March meeting of the FTSE Russell Index Governance Board, promotion and demotion decisions and Watch List changes are formally communicated to the countries affected together with the rationale as evidenced by their scores on the Quality of Markets matrix. Promotion, demotion and Watch List decisions are subsequently published in a public notice along with the timetable for their implementation.

Conclusion

Since its inception in 2003, the FTSE equity country classification process has matured into a transparent and objective mechanism of classifying markets in a way that is designed to meet the ongoing needs of institutional investors. The existence of a Watch List enables investors to plan for potential classification changes and implement these at a time of their own choosing if they so wish. The process also encourages those markets on the Watch List to engage with FTSE Russell to adapt their environment to meet international best practice. The result is a forward-looking, proactive framework that managers can trust.

FTSE Russell keeps the criteria used to determine a country's classification under continuous review. FTSE Russell welcomes the views of all stakeholders on the future evolution of its country classification scheme to ensure it continues to exhibit thought leadership and meets their needs. Timeline of FTSE Equity Country Classification changes effective after market close on the following dates:

- (1) 02 Jan 2001 – Greece promoted from Advanced Emerging to Developed
20 June 2003 – Venezuela deleted from All–World Secondary Emerging at zero value
- (2) 19 Sept 2008 – Israel promoted from Advanced Emerging to Developed
- (3) 19 Sept 2008 – Hungary and Poland promoted from Secondary Emerging to Advanced Emerging
- (4) 18 Sept 2009 – South Korea promoted from Advanced Emerging to Developed
17 Sept 2010 – Argentina demoted from Secondary Emerging to Frontier
- (5) 17 Sept 2010 – UAE added directly to Secondary Emerging from Unclassified (bypassing Frontier)
- (6) 17 Sept 2010 – Malta added to Frontier from being Unclassified
- (7) 17 June 2011 – Czech Republic, Malaysia and Turkey promoted from Secondary Emerging to Advanced Emerging
- (8) 16 March 2012 – Thailand promoted from Secondary Emerging to Advanced Emerging
- (9) 15 June 2012 – Ghana added to Frontier from being Unclassified
- (10) 19 June 2015 – Morocco demoted from Secondary Emerging to Frontier
19 June 2015 – Argentina demoted from Frontier to Unclassified
- (11) 18 March 2016 – Greece demoted from Developed to Advanced Emerging
- (12) 16 September 2016 – Qatar promoted from Frontier to Secondary Emerging (effective in two tranches: 50% in September 2016 and 50% in March 2017)
- (13) 16 September 2016 – Latvia and Palestine added to Frontier from Unclassified
- (14) 15 September 2017 - Argentina and Kazakhstan added to Frontier from Unclassified
- (15) FTSE Russell announced the following equity country classification changes on 29 September 2017:
Poland promoted from Advanced Emerging to Developed (effective at the close on 21 September 2018)
Kuwait promoted to Secondary Emerging from Unclassified (effective in two tranches: 50% effective at the close on 21 September 2018 and 50% at the close on 21 December 2018)
- (16) FTSE Russell announced the following country classification change on 28 March 2018:
Saudi Arabia promoted to Secondary Emerging from Unclassified (commencing from 15 March 2019)
- (17) FTSE Russell announced the following equity country classification changes on 26 September 2018:
China A reclassified as Secondary Emerging from Unclassified (commencing from 21 June 2019)
Iceland reclassified as Frontier from Unclassified (effective from the close on 20 September 2019)
- (18) FTSE Russell announced the following equity country classification changes on 26 September 2019:
Romania reclassified from Frontier to Secondary Emerging (effective from the close on 18 September 2020)
Tanzania reclassified as Frontier from Unclassified (effective from the close on 18 September 2020)
- (19) FTSE Russell announced the following equity country classification changes on 31 March 2020:
Argentina reclassified from Frontier to Unclassified, subject to capital controls not being removed (effective from the close on 30 September 2020)
Peru reclassified from Secondary Emerging to Frontier (effective from the close on 18 September 2020)
- 07 March 2022 – Russia reclassification from Secondary Emerging to Unclassified market status: see [Technical Notice - Treatment of Russia in FTSE Russell Equity Indices](#)
- (20) 01 April 2022 – FTSE Russell announced the reclassification of Iceland from Frontier to Secondary Emerging effective from the open on 19 September 2022

About FTSE Russell

FTSE Russell is a leading global index provider creating and managing a wide range of indices, data and analytic solutions to meet client needs across asset classes, style and strategies. Covering 98% of the investable market, FTSE Russell indices offer a true picture of global markets, combined with the specialist knowledge gained from developing local benchmarks around the world.

FTSE Russell index expertise and products are used extensively by institutional and retail investors globally. For over 30 years, leading asset owners, asset managers, ETF providers and investment banks have chosen FTSE Russell indices to benchmark their investment performance and create investment funds, ETFs, structured products and index-based derivatives. FTSE Russell indices also provide clients with tools for asset allocation, investment strategy analysis and risk management.

A core set of universal principles guides FTSE Russell index design and management: a transparent rules-based methodology is informed by independent committees of leading market participants. FTSE Russell is focused on index innovation and customer partnership applying the highest industry standards and embracing the IOSCO Principles. FTSE Russell is wholly owned by London Stock Exchange Group.
