Section 1

FTSE MIB Open Index methodology

1.0 FTSE MIB Open Index methodology

This methodology is to be read in conjunction with the FTSE MIB Index Ground Rules which are available at www.ftserussell.com.

1.1 FTSE Russell

FTSE Russell is a trading name of FTSE International Limited, Frank Russell Company, FTSE Global Debt Capital Markets Limited (and its subsidiaries FTSE Global Debt Capital Markets Inc. and MTSNext Limited), Mergent, Inc., FTSE Fixed Income LLC and The Yield Book Inc.

1.1.1 FTSE Russell hereby notifies users of the index series that it is possible that circumstances, including external events beyond the control of FTSE Russell, may necessitate changes to, or the cessation of, the index series and therefore, any financial contracts or other financial instruments that reference the index series or investment funds which use the index series to measure their performance should be able to withstand, or otherwise address the possibility of changes to, or cessation of, the index.

1.1.2 Index users who choose to follow this index series or to buy products that claim to follow this index series should assess the merits of the index's rules-based methodology and take independent investment advice before investing their own or client funds. No liability whether as a result of negligence or otherwise is accepted by FTSE Russell for any losses, damages, claims and expenses suffered by any person as a result of:

- any reliance on these Ground Rules, and/or
- any errors or inaccuracies in these Ground Rules, and/or
- any non-application or misapplication of the policies or procedures described in these Ground Rules, and/or
- any errors or inaccuracies in the compilation of the index or any constituent data.

Section 2

Management Responsibilities

2.0 Management Responsibilities

2.1 FTSE International Limited (FTSE)

2.1.1 FTSE is the benchmark administrator of the index.¹

2.1.2 FTSE is responsible for the daily calculation, production and operation of the index series and will:

- maintain records of the index weightings of all constituents;
- make changes to the constituents and their weightings in accordance with the Ground Rules;
- carry out the periodic index reviews of the index series and apply the changes resulting from the reviews as required by the Ground Rules;
- publish changes to the constituent weightings resulting from their ongoing maintenance and the periodic reviews;
- disseminate the indexes.

2.2 Amendments to These Ground Rules

2.2.1 These Ground Rules shall be subject to regular review (at least once a year) by FTSE Russell to ensure that they continue to best reflect the aims of the index. Any proposals for significant amendments to these Ground Rules will be subject to consultation with FTSE Russell advisory committees and other stakeholders if appropriate. The feedback from these consultations will be considered by the FTSE Russell Product Governance Board before approval is granted.

¹ The term administrator is used in this document in the same sense as it is defined in [Regulation \(EU\) 2016/1011 of the European Parliament and of the Council of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds](#) (the European Benchmark Regulation).

Section 3

FTSE Russell Index Policies

3.0 FTSE Russell Index Policies

These Ground Rules should be read in conjunction with the following policy documents which can be accessed using the links below:

3.1 Queries and Complaints

FTSE Russell's complaints procedure can be accessed using the following link:

[Benchmark_Determination_Complaints_Handling_Policy.pdf](#)

3.2 Index Policy for Trading Halts and Market Closures

3.2.1 Guidance for the treatment of index changes in the event of trading halts or market closures can be found using the following link:

[Index_Policy_for_Trading_Halts_and_Market_Closures.pdf](#)

3.3 Index Policy in the Event Clients are Unable to Trade a Market

3.3.1 Details of FTSE Russell's treatment can be accessed using the following link:

[Index_Policy_in_the_Event_Clients_are_Unable_to_Trade_a_Market.pdf](#)

3.4 Policy for Benchmark Methodology Changes

3.4.1 Details of FTSE Russell's policy for making benchmark methodology changes can be accessed using the following link:

[Policy_for_Benchmark_Methodology_Changes.pdf](#)

Section 4

FTSE MIB Open Index Methodology

4.0 FTSE MIB Open Index Methodology

This methodology is to be read in conjunction with the FTSE MIB Index Ground Rules which are available at www.ftserussell.com.

The FTSE MIB constituents all trade on Borsa Italiana's MTA and MIV markets.

Standard trading schedule

The standard trading schedule on MTA and MIV markets is divided into three phases, as described below (all times CET):

Phase 1 – Open Auction Phase	08:00:00 – 09:00:00 09:00:00 – 09:00:59	Pre-auction² Validation³ and Opening⁴
Phase 2 – Continuous	Opening – 17:30:00	Continuous Trading
Phase 3 – Closing Auction Phase	17:30:01 – 17:35:00 17:35:01 – 17:35:59	Pre-auction⁵ Validation⁶ and Closing⁷

If a stock trades in the opening auction, it enters into the continuous trading period immediately. This can occur anytime between 09:00:00 and 09:00:59 during a random period mechanism of 60 seconds. In this situation the opening auction price of the stock shall be used to compute the FTSE MIB Open Index Value.

If there is no matching between the best bid and best offer prices in the opening auction, the stock will not have opening auction trades and will enter into continuous trading phase immediately. This

² **Pre-auction:** determining the theoretical opening auction price

³ **Validation:** validating the theoretical opening auction price

⁴ **Opening:** matching opening auction trades on a share by share basis

⁵ **Pre-auction:** determining the theoretical closing auction price

⁶ **Validation:** validating the theoretical closing auction price

⁷ **Closing:** matching closing action trades on a share by share basis

can occur anytime between 09:00:00 and 09:00:59 during a random period mechanism of 60 seconds. In this case the last price of the previous daily trading session (considering also possible adjustment coefficients) shall be used to compute the FTSE MIB Open Index Value.

Non standard trading schedule

1. According to Borsa Italiana’s rules, if the indicative opening auction price of a stock breaches the price tolerance trading limits, the opening auction is extended for 10 minutes. If bands are still breached at the end of the 10 minutes then further extension(s) will occur. There is no specific end period which forces the stock into continuous trading, therefore in case the stock is kept into the opening auction phase at 9:01:00, in absence of an auction price at 9:01 FTSE shall use the last price of the previous daily trading session (considering also possible adjustment coefficients) to compute the FTSE MIB Open Index value.
2. If a stock belonging to the FTSE MIB index is suspended from trading, the last price of the previous daily trading session (considering also possible adjustment coefficients) will be used to compute the FTSE MIB Open Index value.

FTSE MIB Index and FTSE MIB Open Index behaviour

Below is a summary of the headline FTSE MIB Index and the FTSE MIB Open Index to help articulate the differences:

FTSE MIB Open Index	09:01:00	Calculation and dissemination*
FTSE MIB Index – open and continuous	09:01:00 – 17:30:00	Continuous Trading
FTSE MIB Index – closing	17:30:01 – 17:35:00 17:35:00 – 17:35:59	Index is in waiting state Closing

Note that the FTSE MIB Index and the FTSE MIB Open Index are separate indexes and will have different index codes to distinguish the two indexes (FTSEMIB and FTSEMIBO).

* **FTSE MIB Open Index** – This index is normally calculated around 09:01 and published once per day by approximately 09:45.

FTSE MIB Index – This index opens at 09:01:00. Due to the random closing mechanism of the opening auction, the first index value published may contain both open auction prices and continuous trading prices. Therefore it will never match the FTSE MIB Open Index value.

The continuous trading period occurs between 09:01:00 and 17:30:00. During this period only traded prices are used in the index calculations. Between 17:30:01 and 17:35:00 the index sits and waits for the next price updates which will be the closing auctions prices.

The index will close between 17:35:01 and 17:36:00 when all securities have completed their closing auction. It is possible that a security has an extended auction, and this can take the closing auction process to a random close between 17:40:00 and 17:41:00

FTSE MIB derivatives expiration

According to art. IA.9.1.1 paragraph 6 and art. IA.9.1.6 paragraph 9 of Borsa Italiana's Instructions to Market Rules, FTSE MIB futures and FTSE MIB option settlement values are calculated by Borsa Italiana and based on opening auction prices. In case of extended auctions trading schedule, they may therefore slightly differ from the FTSE MIB Open Index.
