

Impact of Recent Russian Sanctions in FTSE Fixed Income Indices: Update

04 March 2022

FTSE Russell has been actively monitoring the impact of sanctions imposed by the United States, European Union and United Kingdom on Russian government bonds and Russian entities on FTSE fixed income indices.¹ FTSE Russell also acknowledges the recent imposition of capital controls by the Central Bank of Russia.

FTSE Russell has received feedback from market participants and its FTSE fixed income external advisory committees on the impact of the current environment for international investors. This feedback has indicated a complete inability for international investors to repatriate bond proceeds in ruble and non-ruble denominated assets from the Russian government and Russian bond-issuers. In turn, this has resulted in either a complete or near complete lack of price discovery mechanisms for such securities. Additionally, FTSE Russell has noted the corresponding significant impairment of the ruble foreign exchange market.

FTSE Russell's Index Governance Board has deemed the imposition of the sanctions by the United States, the European Union and the United Kingdom, along with the sudden imposition of the aforementioned capital controls by the Russian government, to constitute a market disruption event. In making this determination, FTSE Russell has acted in accordance with its published [FTSE Fixed Income Index Statement of Principles](#) and the [FTSE Fixed Income Country Classification Framework](#).² The FTSE Fixed Income Country Classification Framework allows for the following:

"In the case of a market disruption event (i.e., the sudden imposition of prohibitive capital controls), FTSE Russell will reference its Statement of Principles to determine whether an off-cycle review of Market Accessibility Levels should be triggered."

FTSE Russell has assessed the market against its published Fixed Income Country Classification criteria and announces that the Market Accessibility Level for local currency, fixed-rate Russian government bonds will change from "1" to "Unassigned", effective immediately.

FTSE Russell announces the following handling with respect to the FTSE fixed income indices:

- All ruble and non-ruble denominated Russian government bonds, and hard currency bonds issued by Russian domiciled issuers will be excluded from all FTSE fixed income indices, effective as of March 2022 month-end (April 2022 index profiles).
- The price and accrued interest for all ruble-denominated government bonds, hard currency domestic ("RU" ISINs) government bonds and explicitly sanctioned Russian entities will be set to zero, effective as of 07 March 2022. This is in recognition of the practical impact of the capital controls imposed by the Russian government on investors.
- FTSE Russell will continue to monitor evolving market conditions and reflect updated prices for USD-denominated international ("US" ISINs) Russian government bonds and hard currency bonds issued by Russian domiciled issuers through March 2022 month-end to the extent that this is feasible.

¹ FTSE Russell previously published an [announcement](#) on 25 February 2022 regarding the impact to its fixed income indices.

² The FTSE Fixed Income Country Classification Framework is a robust, evidence-drive and process-oriented framework for assessing the index eligibility of local currency government bond markets and assigns a Market Accessibility Level for each country based on a transparent and publicly available set of criteria. Market Accessibility Levels are incorporated in the index rules for flagship FTSE multi-currency bond indices, including the FTSE Emerging Markets Government Bond Index (EMGBI).

These changes will be reflected in the FTSE Emerging Markets Government Bond Index (EMGBI), the FTSE World Broad Investment Grade Index (WorldBIG), the FTSE US Broad Investment Grade Index (USBIG), FTSE Emerging Markets USD Broad Bond Index (EMUSDBBI), FTSE Euro Broad Investment Grade Index (EuroBIG), the FTSE Eurodollar Index and derived indices.³ Index users are encouraged to contact FTSE Russell regarding the impact to any custom indices. The remainder of this announcement provides further details on impacted securities.

The aforementioned index handling for FTSE fixed income indices is consistent with the [treatment announced for FTSE Russell equity indices on 02 March 2022](#).

Details of Impacted Russian Government Bonds included in FTSE Fixed Income Indices

As of 28 February 2022, 26 RUB-denominated Russian government bonds with RUB 9,116.0 billion (USD 85.0 billion) in par amount outstanding were included in the FTSE Emerging Markets Government Bond Index (EMGBI), comprising 1.90% of the index on a market value weighted basis. These securities will exit FTSE fixed income indices at March 2022 month-end with price and accrued interest set to zero. Figure 1 provides further details on these securities.

³ For avoidance of doubt, impacted bonds will be removed from FTSE fixed income sustainable indices.

As of 28 February 2022, 10 USD-denominated Russian government bonds with USD 31.1 billion in par amount outstanding were eligible for the FTSE US Broad Investment Grade Index (USBIG) and FTSE Emerging Markets USD Broad Bond Index (EMUSDBBI), comprising 0.04% and 0.54% of these indices, respectively, on a market value weighted basis. These securities were also included in other FTSE fixed income indices that derive their membership from the USBIG and EMUSDBBI, such as the FTSE World Broad Investment Grade Index (WorldBIG) and FTSE EM USD Government Bond Index (EMUSDGBI). These securities will be excluded from FTSE fixed income indices at March 2022 month-end.

Figure 2 provides further details of the domestic securities that will be removed from the index with price and accrued interest set to zero and Figure 3 provides further details of the international securities where pricing will be monitored through March 2022 month-end.

Impact of Bonds Issued by Non-Government Russian Entities included in FTSE Fixed Income Indices

Following a comprehensive review of the index inclusion of hard currency bonds issued by Russian-domiciled non-government entities, a full list of impacted securities will be published to index users in due course and with sufficient notice in advance of March 2022 month-end rebalances.

For the avoidance of doubt, FTSE Russell confirms that the four securities listed in Figure 5 that are subject to explicit sanctions will be removed from FTSE fixed income indices with price and accrued interest set to zero at the March 2022 month-end rebalance.
