Dian Swastatika Sentosa (Indonesia): Index Review Treatment Update

05 September 2025

Further to the notice published on [22 August 2025](#), FTSE Russell would like to confirm the following updates relating to the index treatment of **Dian Swastatika Sentosa (B504TB0, Indonesia)** at the forthcoming FTSE Global Index Series semi-annual index review.

FTSE Russell has received confirmation from the Indonesia Stock Exchange (IDX) that the collateral requirement has been reduced from 80% to 40%, effective 01 September 2025. As such, FTSE Russell will make no adjustments to account for the collateral requirement.

However, FTSE Russell has reviewed the company's free float based on data obtained from the Indonesia Central Securities Depository (KSEI). Consequently, the company's investability weight will be updated from 25.4272% to 15.1473%, in accordance with the FTSE Russell [Free Float Restrictions](#) guidelines. Please note, in accordance with the index methodology, Treasury Shares are excluded from the total shares in issue figure when calculating the free float of a company.

Accordingly, FTSE Russell confirms that Dian Swastatika Sentosa will be added to the FTSE Global Equity Index Series (GEIS) and associated indices as a Large Cap Indonesia constituent with an investability weight of 15.1473%, at the September 2025 semi-annual index review, which will take effect from the open on Monday 22 September 2025. The Indicative review files published from Friday 05 September 2025 will reflect the updated investability weight.

FTSE Russell is further assessing the applicability of KSEI data in determining the free float of other Indonesian companies and will provide an update in due course. For the avoidance of doubt, this will not result in any further updates to Indonesian companies at the September 2025 semi-annual index review.

Please contact your customer service representative if you have any questions.
